VEC METRIC CARD

TSR

Tissue scale ratio

scale_log_ratio

ZERO IS IDEAL

T2

OFFICIAL WEIGHT CONTEXT

1/3 of T2 shape+scale group (25%)

THE QUESTION

Is the predicted tissue at the right physical growth scale?

WHAT IT REWARDS

Matched global size; signed log ratio is scored by absolute distance from 0.

COMMON FAILURE

Correct-looking shape that is uniformly too large or too small.

DEBUG NEXT

Compare centered RMS radius / pairwise distance scale before changing topology.
